

**AMAYA SOLUTIONS, INC.  
DBA AMERICAN WATER CHEMICALS**

**NANO MATERIALS STATEMENT  
January 2023**

Engineered nano materials are defined as purposely manufactured materials with one or more dimensions on the order of 100nm or less, or, whose functional parts are on the same order if 100nm or less.

This includes structures, agglomerates, and/or aggregates which, in whole or in part, retain size of 100nm or less.

Amaya Solutions, Inc., DBA American Water Chemicals, does not manufacture nano materials and, to the best of our knowledge, does not source raw materials that have been formulated with engineered nanomaterials.
